

PROJECT UPDATE

PROJECT: Pitt Street Mall, Sydney

Builder: Westfields

Fabricator: Architectural Glass Projects

Area 1: Sealing of Aluminium to masonry, Glass Butt joints

Installer: Architectural Glass Projects

Product: Spectrem 2 Structural Silicone, Tremsil 600 Silicone, Dymonic FC

The completed project encompasses six interconnected buildings totaling 168,500 sqm of gross lettable area that together will create a world-class retail, tourism and office location in the heart of Sydney's CBD. The development includes a seven-level mall, which amalgamates the old Imperial, Glasshouse and Centrepoint shopping centres to create 250 new shops and flagship stores, as well as a new commercial tower, a rooftop bar precinct and an overhaul of the office building at 100 Market Street.
